## 2. LOCATION

Users type in a certain location and all pictures tagged at such location are returned by the program.

## 1. CAPTIONS

Users type in a word which allows program to search for that word in Instagram captions. Captions with this word will be returned by the program.

## 3. BIOGRAPHY

User types in a word and the program returns iG bios with that word. The user is able to search IG users bio to find people they're interested in following and pictures they like.

## 4. LIKES

User types in a certain number, and all pictures with that number of likes will be returned by the program..
